

Networking

“Networking is an investment in your business. It takes time and when done correctly can yield great results for years to come.”

- Diane Helbig

First of all **networking** means gaining knowledge about possible participants (e.g. their task, profile, way of working) and then establishing personal relationships that are in the interest of all partners so that everyone can rely on these relationships.

Exchange and open communication play an important role. On the basis of networking, there is the possibility of establishing cooperation and thus developing joint ideas and projects.
